

Simmons College File Sharing Policy

This article is intended to satisfy the Higher Education Opportunity Act of 2008, which includes provisions that are designed to reduce the illegal uploading and downloading of copyrighted works through peer-to-peer (P2P) file sharing and to inform and educate the Simmons College community about illegal online file sharing.

As online music, movies, games, and other media have become commonplace, so has piracy and the theft of copyrighted material. Companies who own the copyrighted material being pirated frequently pursue those who are not abiding by the law. By tracking the files being transferred and the users behind the transfers, these companies are increasingly putting pressure on internet service providers (ISPs) to reveal the identities of the computer users who are infringing copyrights. In recent years, a small number of students have been sued by copyright holders and required to pay substantial settlements.

Simmons College provides an online network for its community to utilize as a tool for education and communication. With that access comes the responsibility to show the community how to use the network properly and productively. The idea of file sharing is like many other technological innovations, in that it is not an inherently negative or a positive invention, it is only when a people decide to use it in such a fashion that the tool negates progress rather than furthering it.

How File Sharing Programs Work

Most file sharing programs use a technology called "peer-to-peer sharing" in order to transfer files. To find out more about peer-to-peer sharing (P2P) visit the links below.

When is File Sharing Illegal? □

Simply stated, file sharing is usually illegal when you are downloading or uploading a file without the consent of the copyright owner of the music or other content in the file. There are some gray areas in this evolving area of the law. For further information, please refer to the College's copyright policy:

What Happens if a Student is Investigated?

If a claim is made by a copyright holder against a student, the student will be notified by the College and given an opportunity to address the complaint. If the student is found to be using the Simmons College network improperly or fails to comply with the Simmons College Acceptable Use Policy, that student could lose network privileges. Depending on the severity of the infractions, other actions could also be taken. Theft of property, including copyrighted material, is also a violation of the College's Honor Code.

In addition, users can also be sought out by the holders of the copyrighted information for restitution, which may incur heavy fines and time in prison.
