How to Enter a Requisition in Workday

Please note: Prior to creating a requisition, contracts will require a contract routing form be completed indicating the contract has been reviewed and approved by General Counsel and all other required parties.

1. Login to workday.simmons.edu

2. In the Search Bar, type “Create Requisition” Note: any abbreviation will also bring up the create requisition option eg: cre req, req etc

3. From the search results list, click the “Create Requisition” task.

4. On the following screen, many of the fields will have auto-filled and should not be changed.

   Please update the “Requisition Type” field. Select from the dropdown list as appropriate:
   - A blanket purchase order should be used when there will be multiple/repetitive purchases against this order throughout the year
   - A capital purchase order should be used for capital projects only. Will require a project #.
   - A standard purchase order indicates a request for a one time purchase of goods or service

The cost center will autofill based on your Payroll cost center. On this screen, you may also update the cost center or Gift/Project/Additional Worktag numbers as needed. Please note this can also be changed later in the requisition creation process.

5. Click OK
6. From the “Select an Option” section on the next screen, click “Request Non-Catalog Items”.

**Extended Amount**: Enter the total cost of the service here.

**Memo**: This is not a required field. This is an internal memo that does not print on the PO – include any information that would be helpful to approvers to know about this line item being purchased. Ex: Item will replace outdated supply.
Request Goods – when physical objects are purchased

*Note: Goods will need to be received in Workday by the requestor once delivered if entered as a goods request before an invoice is entered; for this reason, it is preferable for most requests to instead be entered as service requisitions.*
