Python Download Instructions

1. Go to https://www.python.org/downloads/.
   a. If you are using Windows, click the yellow "Download" button with the latest version of Python (ex. "Python 3.13.7).
   b. If you are using a different operating system, click the link below the "Download" button with your operating system.

2. You should see a white page pop up with a list of Python versions, with the latest version at the top. Click the link to download the latest version.

3. Open the file you have downloaded to launch the installer.
   a. If you are on Windows, select the option that says "Add python.exe to PATH" to the left of the "Cancel" button
   b. If you don't have this option, leave the settings as is. Click the option that says "Install Now".
