

## What is oXygen?

oXygen is an XML editor, which helps write, format, and validate XML documents and schemas. SLIS Tech offers yearly license keys for SLIS students.

## To get started:

1. Go to [https://www.oxygenxml.com/xml\\_editor/download\\_oxygenxml\\_editor.html](https://www.oxygenxml.com/xml_editor/download_oxygenxml_editor.html) and locate the blue tab labeled with your operating system. Click the red “Download” button.

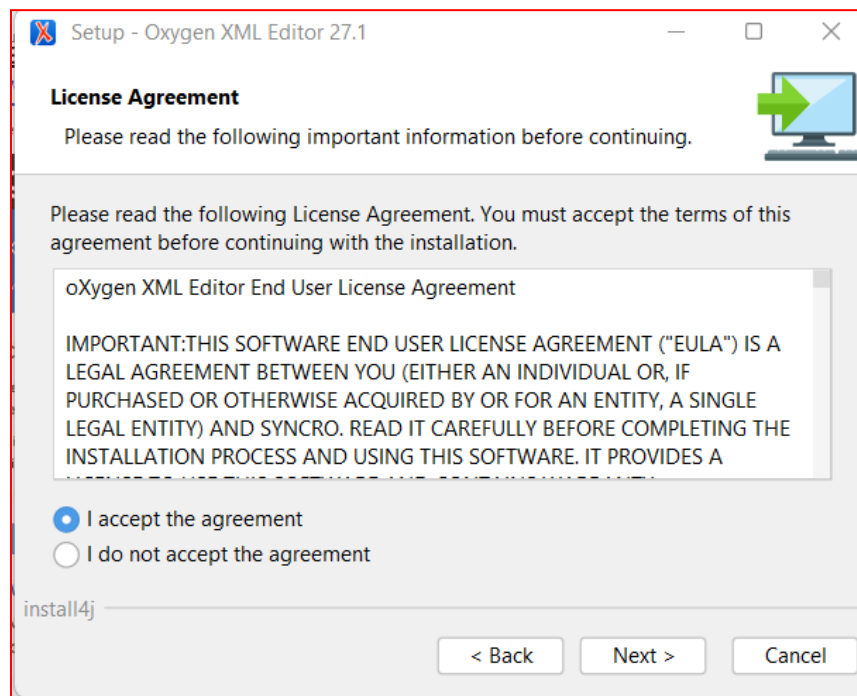

2. The file will begin downloading, and you will be taken to a registration page. **Do NOT register at this point in time.** You may also get a pop up prompting you to sign in with your email, but **do NOT sign in**. Once the file has finished downloading, click on it to open the installer.

*For MACS ONLY: When you click on the installer file, you may get a window like this:*

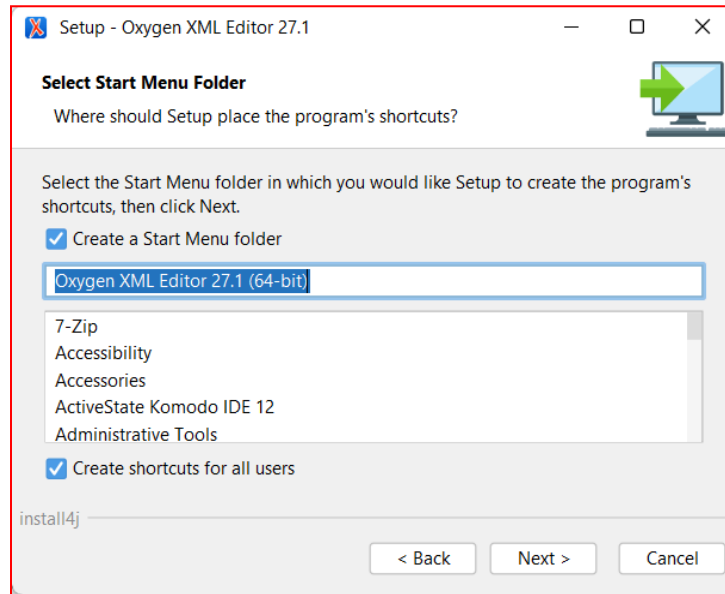

*If so, drag the folder on the left into the folder on the right. After the data has finished copying, go into your applications folder and find the Oxygen XML Editor.app, (Applications/Oxygen XML Editor/Oxygen XML Editor.app) You may get a pop-up warning that this was an application downloaded from the internet. Click OK.*

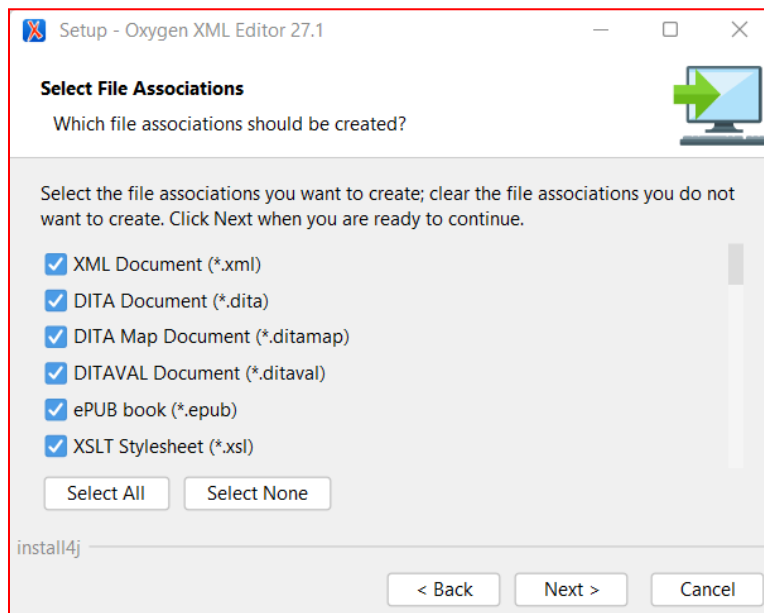

3. When the program launches, choose your preferred language.
4. If a window comes up asking to allow changes to your computer, click “Allow”.
5. The next window will have the licensing agreement. Select the “I accept the agreement” option and click next.

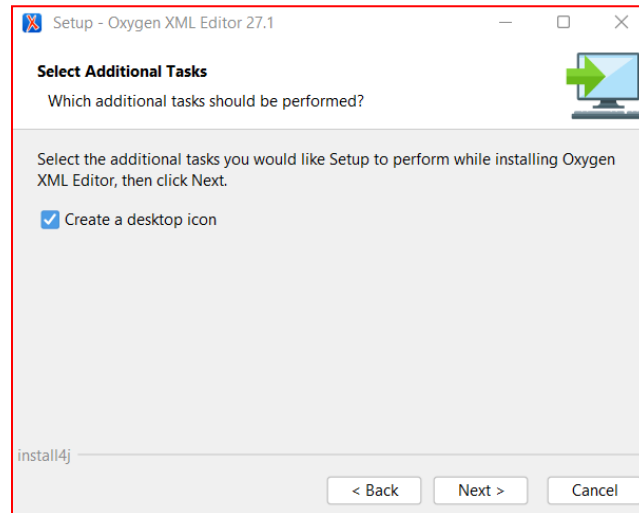

6. For the file location window click “next”. The next window should say “Select start menu folder”. Make sure the “Create a Start menu folder” option and the “Create shortcut for all users” option are both selected, and click next.

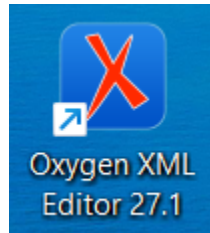

7. The next window will ask you to choose file associations. Click the button that says “Select All”, then click next.

8. For the next window labeled “Select additional tasks”, make sure the “Create a desktop shortcut” box is selected and click next. On the final window, make sure the “Launch Oxygen” option is selected and click finish.

9. Oxygen should launch automatically; if it doesn't, look for the blue icon labeled “Oxygen XML Editor” on your desktop and click to open the program.

10. A window will open asking you to obtain a license. Make sure the “Use a license key” option is selected, then copy and paste this text into the provided text box:

Registration\_Name=Micah Hudson [SMP RENEWAL]

Company=Simmons University

Category=Academic-Classroom

Component=XML-Editor, XSLT-Debugger, Saxon-SA

Version=27

Number\_of\_Licenses=1

Date=07-17-2025

Subscription=420
